PROJECTS

AI Interview Assistant | [GitHub](#) | [Live Demo](#)

Python, Flask, Gemini AI, HTML, CSS, JavaScript

- Developed an AI-powered interview preparation platform using Gemini AI to simulate technical and HR interviews.
- Implemented personalized interview question generation based on candidates' resumes and target job descriptions.
- Built an AI-driven evaluation system that analyzes user responses, generates performance scores, and provides personalized improvement suggestions.
- Deployed the application on Render and managed version control using GitHub.

Automated Loan Approval Prediction System | [GitHub](#) | [Live Demo](#)

Python, Pandas, Scikit-learn, Flask

- Built an end-to-end machine learning application to predict loan eligibility using Python, Pandas, and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Achieved approximately **80% prediction accuracy** using a Decision Tree Classifier.
- Developed and deployed a Flask web application on Render for real-time loan eligibility prediction and managed the project using GitHub.

AI Job Portal (In Progress) | [GitHub](#)

Java, Spring Boot, MySQL, REST APIs, Postman

- Developing an AI-powered job portal for students and recruiters using Spring Boot and MySQL.
- Implemented secure user registration, login, and role-based authentication with REST APIs.
- Designed and tested RESTful APIs using Postman and integrated MySQL for efficient data storage and retrieval.
- Currently building job posting, job application, and AI-based resume matching features.
